

Docket No. F-7348

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant : Katsuhiko HATA, et al.
Serial No. : 10/089,495
Filed : May 1, 2002
For : STABLY DISPERSED MAGNETIC VISCOUS FLUID
Group Art Unit : 1755
Examiner : Carol M. Koslow
Confirmation No. : 9451
Customer No. : 000028107

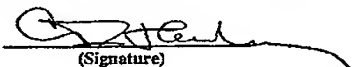

RECEIVED
DEC 3 2003
TCT-17100

See P. 2

Certificate of Mailing Under 37 CFR 1.8

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to COMMISSIONER FOR PATENTS, P.O. Box 1450, Alexandria, VA 22313-1450 on November 24, 2003.

MAIL STOP AMENDMENT FEE

Commissioner for Patents

P.O. Box 1450, Alexandria, VA 22313-1450

AMENDMENT

Sir:

In response to the Office Action of July 23, 2003, please amend this application as follows:

PT148.m01 (PC 3).wpd

12/18/2003 PFENNELL 00000001 101250 10089495

01 FC:1251 110.00 DA

characteristics and yield stress of the fluid and wherein the magnetic particles are uniformly dispersed in the magnetorheological fluid at all times, including when the mechanical device is operated (see p.2, lines 5-33 for specification). Levin, on the other hand, does not relate to the incorporation of a magnetorheological fluid in a mechanical device but to a magnetic polishing fluid ("MPF"). Moreover, in response to a magnetic field gradient, the particles in the MPF are pushed out of the fluid in a direction perpendicular to the gradient (col. 4, lines 15-20) whereas claims 7-11 recite that the magnetic particles are uniformly dispersed in the magnetorheological fluid at all times, including when the mechanical device is operated.

Applicant respectfully requests a one month extension of time for responding to the Office Action. Please charge the fee of \$110 for the extension of time to Deposit Account No. 10-1250.

For the foregoing reasons, it is believed that all the claims are now in condition for allowance and that action is earnestly solicited.

Respectfully submitted,

JORDAN AND HAMBURG LLP
